SURFACE DETERMINATION OF ABRASIVE GRAINS
AND ITS IMPORTANCE IN THE MANUFACTURE OF
ABRASIVE BODIES. 9 Jan 63, 8p. 6 refs.
Order from SLA \$1.10

63-10652

Trans. of German language article from unidentified
source, n.d.

DESCRIPTORS: *Abrasives, Bonding, Surface area,
Particle size, Measurement, Production.

The determination of specific surface area according
to the method of Gosta Ringqvist is applied to the ex-
amination of abrasive grain. The method proves to be
well suited for operating purposes, and reproducibility
corresponds to requirements in practice. To maintain
a uniform quality, particularly in abrasive body hard-
ness, it is necessary to check variations in grain sur-
face area in production, and to correct the production
technology accordingly.
